If you are treating an infection in folded areas of your body you can cover the treated area with a gauze strip, especially at night. If you do, use a fresh, clean gauze strip each time you apply the cream.

Duration of normal treatment
Do not use in children below 12 years of age.
For adults and children above 12 years:
Cream:
Athlete's foot, superficial skin mycoses: apply once a day for 1 week.

Skin candidiasis (intertrigo or sweat rash): apply 1-2 times a day for 1 week.

Pityriasis versicolor: apply 1-2 times a day for 2 weeks.

Use the cream for the recommended treatment period even if the infection seems to be better after a few days. Infections usually appear to improve within a few days, but may reappear if the cream is not applied regularly or is stopped too early.

The cream should start to improve your skin condition in a few days. The cream will continue to work even after you have completed the treatment.

If you have not noticed any signs of improvement within 2 weeks of first starting treatment, please see your doctor or pharmacist who will advise you.

UNDESIRABLE SIDE EFFECTS
What undesirable side effects can LAMISIL have?
Like all medicines, Lamisil Cream can cause side effects, although not everybody gets them.

STOP using Lamisil Cream and seek medical help immediately if you have any of the following which may be signs of an allergic reaction:

- difficulty in breathing or swallowing
- swelling of the face, lips, tongue or throat
- severe itching of the skin, with a red rash or raised bumps

When using this product you may experience:

- Skin peeling, itching.
- Skin lesion, scab, skin disorder, skin color changes, redness, burning, pain, application site pain, application site irritation.

Other side effects include:

- Dry skin, eczema.
- Contact dermatitis which is a type of inflammation of the skin.
- Skin rash.
- Worsening of disease symptoms.
- Allergic reactions.

If Lamisil Cream is accidentally applied to the eyes, eye irritation may occur.

If you get other any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet.

SPECIAL REMARKS
What should also be taken into consideration?
Medicines must be kept out of the sight and reach of children. If Lamisil is accidentally swallowed, tell your doctor or pharmacist immediately. Do not store above 30 °C. The medicine may not be used beyond the date printed on the package with the indication <EXP>. Keep the tube closed and in the carton. Store in the original package. For more comprehensive information, consult your doctor or pharmacist who have more detailed information intended for representatives of the medical professions.

If you forget to use Lamisil Cream
If you forget an application of the cream, apply it as soon as possible and then carry on as normal. If you only remember at the time of the next application, just apply the usual amount and then carry on as normal. Do not take a double dose to make up for a forgotten dose. Should a larger amount of Lamisil Cream be inadvertently ingested, adverse effects similar to those observed with an overdosage of Lamisil tablets are to be expected. These include headache, nausea, epigastric pain and dizziness.

COMPOSITION
Cream: One gram of Lamisil 1% Cream contains 10 mg terbinafine hydrochloride (active ingredient), equivalent to 8.8 mg of terbinafine base, benzyl alcohol and other excipients.

PRESENTATION
Cream 1%: 7.5 g, 10 g and 15 g tube. (Not all pack sizes may be marketed)

INFORMATION UPDATED
May 2018.
